We're delighted to welcome our latest member to the ESMA International Network Community – Novi8 Water from The Netherlands.

Novi8 Water is a Dutch based company built on two powerful principles: renewal and infinity.

Novi represents renewal, progress, and the continuous pursuit of new possibilities. The 8 symbolizes infinity, limitless potential, continuous growth, and the pursuit of exceptional results. Together, they form the foundation of their brand and their vision.

The water behind Novi8 originates from Telemark, Norway, a region of lakes, nature, silence and clear water, often called the 8th wonder of the world. With a natural pH of 8, the inspiration behind their name, the source has received three awards from the Norwegian authorities in recognition of its purity and quality.

No heavy claims. No unnecessary additives. Just pure Norwegian water with a positive flow. Pure Norwegian Water, Positive Energy.

For their packaging, they have consciously chosen Tetra Pak®, one of the most sustainable packaging solutions available today.

Novi8 Water believe in positive energy, ambition, and the power of forward thinking. Guided by these values, they are building an international premium brand that inspires people, businesses, and communities to think bigger, grow further, and create lasting impact.
